### Pacific-Europe Network for Science, Technology and Innovation

Sara Medina, SPI <u>saramedina@spi.pt</u> Wendy Snowdon, WHO <u>snowdonw@wpro.who.int</u> Auckland, 10-11 December 2014

### Contents

# 1. Think Tank 1 – Health NCDs

2. Main Outcomes

### 1. Think Tank 1 – Health NCDs

Think Tank 1 - Health NCDs - Tackling Non-Communicable Diseases (NCDs): Lifestyle Options for Improved Nutrition and Well Being

PACE-Net Plus Conference, Bremen, Germany (9-11 September)

- Non-communicable diseases (NCDs) are currently recognized by WHO as the leading cause of death in the world.
- The four major NCDs upon which this Think Tank largely focused are: cardiovascular diseases (CVDs), chronic respiratory diseases, cancers, and type two diabetes mellitus (hereafter diabetes).

### **2.** Think Tank 1 – Health NCDs

### Think Tank 1 Structure

32 delegates (including facilitators)

Two facilitators: Amy McLennan, University of Oxford and Gary Morgan, Executive Director of the MPT Innovation Group

Two keynote speakers: Peter Hoejskov, from WHO WPRO, Fiji and Nicolas Villacorta, German National Contact Point (Life Sciences) for H2020

### **Situational analysis**

- Wide range of public initiatives across the (South) Pacific region.
- One-size-fits-all approaches are unlikely to be successful.
- Strong interest from both Pacific and EU in research collaboration first step is understanding of current situation.

### **Situational analysis**

- 'Strengths' may simultaneously be 'Weaknesses': eg.: country size.
- Lack of resources (money, human resources, evaluation and surveillance).
- Main challenges:
  - turning policy statements and commitments into real actions;
  - achieving multi-sectoral cooperation;
  - engaging local communities;
  - improving communication between stakeholders.

#### **Priorities**

#### Food Policy

- Critical approach to improve diets. Requires monitoring and evaluation and health impact assessment (HIA) of cross-sectoral policies including trade agreements
- Development of relevant evidence for Pacific islands, with global significance

#### **Suggested Action Plans**

#### Food Policy

- Health impact assessment of trade
  agreements and cross-sectoral policies
- Development for key food policy interventions (building evidence base)
- Public health advocacy institute for the Pacific

#### **Priorities**

Community informed and led action

- Increase focus on community-based NCD intervention studies
- Provide provision of prevention and treatment via primary health care

#### **Suggested Action Plans**

Community informed and led action

- Strengthening civil society organizations
- Build on existing structures and traditional systems

	Priorities		Suggested Action Plans
<u>Research</u>		Research	
•	Harmonization of research priorities	•	Stronger focus and resource allocation for
	and cooperation		NCD related research
•	Accessibility of research	•	Culturally appropriate and national
	opportunities and findings		prioritized research
•	Turning research into action and	•	Build research capacity and
	holding policy makers accountable		dissemination within the EU and Pacific

Priorities	Suggested Action Plans
Data and surveillance	Data and surveillance
Approach to policy development	Build a regional COD coding facility
based on evidence and data	
	Create an ICT platform for improved
Monitor progress of quality of data	access to NCD data and knowledge
across a range of domains	
	Build regional innovative accountability
Use and translation of data into	frameworks – support Pacific Monitoring
powerful messages to drive policy	Alliance for NCD Action (Pacific MANA)

and change

### **Project partners**

PACE-Net Plus is a project funded by the European Commission to reinforce EU-Pacific cooperation on Science, Technology & Innovation, and to promote the development of mutually beneficial partnerships. Grant agreement n° 609490.
