Nadi, Fiji

NiDiPac, the context

- Pacific region:

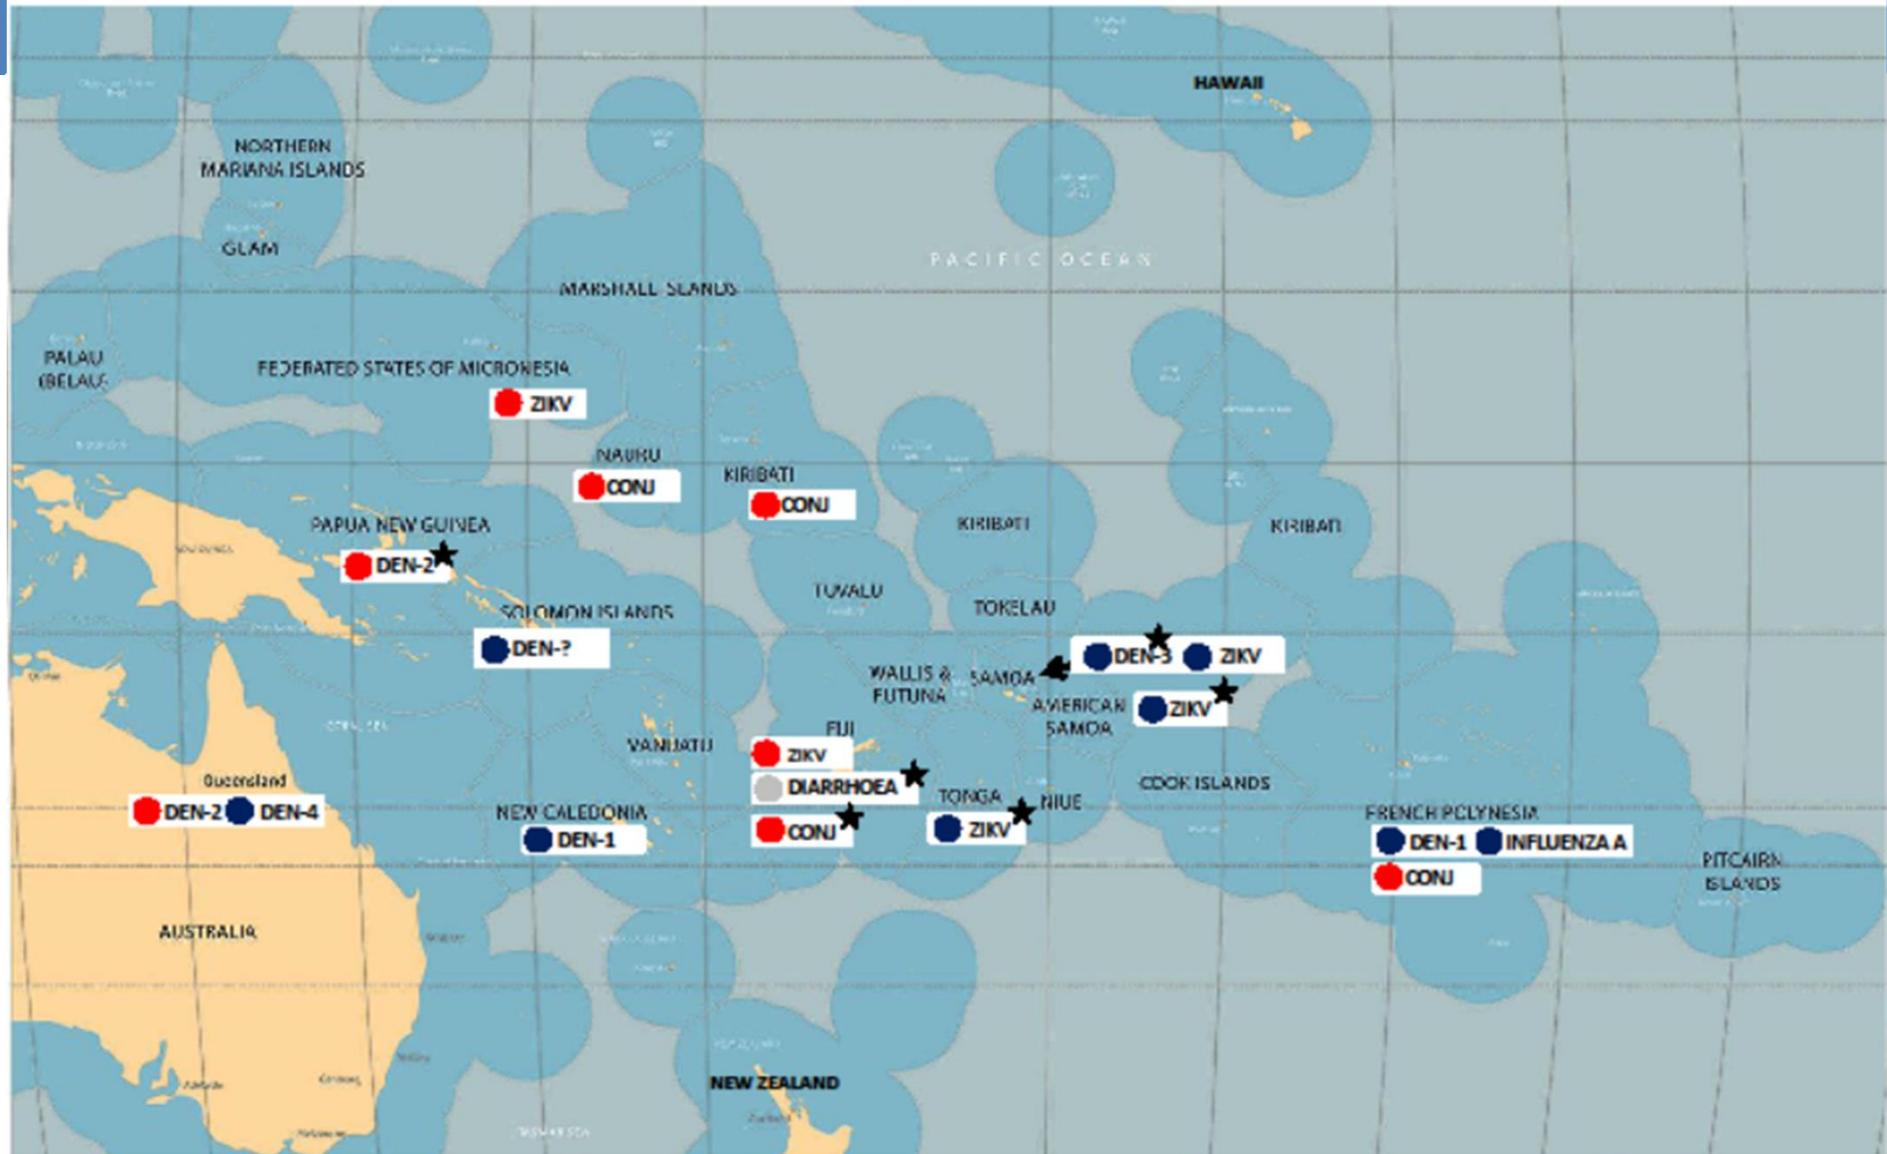

NiDiPac, the context

- Pacific region:

Epidemic and emerging disease alerts in the Pacific region as of 25 April 2016

- Legend**
- Cases reported are increasing or peaking.
 - Cases reported are decreasing or circulation is ongoing.
 - Awaiting confirmation of aetiology.
 - ★ No update provided for at least two weeks.

- DEN: Dengue
- DEN-?: Dengue undetermined serotype
- TYPH: Typhoid fever
- CHIK: Chikungunya
- ZIKV: Zika virus
- CONJ: Conjunctivitis

An interactive version of the map is available online at: www.pcp.int/ohd/epidemics/

NiDiPac: the project

- Partners:

- Objectives:

Improve the early diagnosis of infectious disease by implementing new easy-to-use and rapid bedside diagnostic tests using either serum or other samples using the kodecyte technology

NiDiPac: the innovative technology

- KODE technology for enzymatic immunoassay:

- Classic:

random
limited control

- Kode:

easy to paint
controllable

- The applications:

- For NiDiPac (Inkjet printing)

NiDiPac: the test

- Design for leptospirosis diagnostic:

- Ethics clearance: OK
- Biobank selection (PNG-IMR and IPNC): OK
- Lepto peptides selection and production: OK

- Biobank screening for lepto by ELISA kits: in progress (end: mid-july 2016): PNG-IMR
- KODE-Lepto construct: in progress (end: september 2016): AUT/KODE
- Validation of KODE-Lepto regarding the reference method: scheduled in october 2016 (IPNC)

NiDiPac: the workshop

Institut Pasteur de Nouvelle-Calédonie

PAPA NEW GUINEA INSTITUTE OF MEDICAL RESEARCH

AUT

Welcome to the
NIDI-PAC Working Group
Meeting

WO1609 (level 16)

Thursday 16 June 2016
9 am to 3 pm

PACE-NET 2016

Pacific Community
Communauté du Pacifique

QUT
Queensland University of Technology
Brisbane Australia

Kode
Biotech

Discussions about:

- Diseases diagnostic in the Pacific with a special focus on Zika and Leptospirosis (PNG-IMR, IPNC, SPC, LabPlus)
- Test Validation and Commercialisation (QUT)
- Ethics procedures (AUT)
- Advancement of the project (PNG-IMR, AUT, IPNC)

NiDiPac: the outcome

- NiDiPac:
 - Validation of the Proof of concept
 - Go/Not Go decision
- Next steps:
 - Develop the test for other diseases in order to propose a panel for febrile-illness (dengue, zika, chikungunya, leptospirosis, malaria), encephalitis-illness...
 - Validation at a wider scale: Fiji, PNG, Vanuatu where several diseases are circulating in the same time

Thank you!
